Portuguese Podengo Colours

SKIN: Mucous membranes preferably dark pigmented or always darker than the coat; thin and tight skin.

COAT:

Hair: Short or long coat; medium thickness; smooth hair when short or wire hair when long; the short coat is denser than the long one; in the long and wire variety, the hair in the muzzle is long (bearded); without undercoat.

Colour: accepted – yellow, fawn, sable, in the light, common and dark varieties; solid, white-patched or white with patches of these colours.
In the Small Podengo, the following colours are accepted but not preferred: black, brown, in their tones; solid, white-patched or white with patches of these colours.
